***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: the examiner has considered the amendment and response filed by applicants on February 24, 2009, and the arguments therein. Applicants' arguments were found persuasive. Applicants' process, employing a specific ratio of reactants, and a Mo-O-K-based catalyst that comprises a mixture of metal oxides or sulfides as promoter, affords applicants with an increase in methylmercaptan product. The examiner concedes that it would not have been apparent from the closest prior art of record, i.e. those references relied upon for the rejection of record, that by modifying the concentration of reactants in the prior art processes, and by using a promoter having more than one metal oxide and/or sulfide, a substantial increase in yield of product would have been obtained. As such, the instant claims are now allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicants' representative, Robert Weilacher on April 24, 2009.

The application has been amended as follows:

In claim 26, line 2, **(n=1-10)** has been deleted.

Claims 33-40 have been cancelled.

*In the Specification:*

The following has been inserted on page 4 of the specification above the heading, "Detailed Description of the Invention".

*Brief Description of the Drawing*

Figure 1 shows the selectivity for methylmercaptan formation.
